

Synthesis: completed experiments answer different hypotheses

	H1 Intent bottleneck	Prompt-only fails despite JSON validity	Supported
	H2 Temporal support	Metadata adds +11.0 temporal-filter pts	Supported
	H3 Safety	Gate gives low false plot without over-refusal	Supported
	H4 Hard negatives	Ranker >98% pairwise, but order sensitivity remain	Supported w/ caveat
	H5 Architecture	Rank/layer placement changes temporal and safety behavior	Supported
	Robustness	Vietnamese/non-WB lower full intent	Open
